EventForecast — Your Daily Weather & Event Planner

About:
EventForecast is a fictional AI-powered assistant designed to help users plan their day by combining real-time weather data with curated local events. The service provides quick, conversational answers, allowing users to make informed decisions about their plans without jumping between different websites or apps.

Mission:
To make daily planning effortless by providing accurate weather information and relevant events through a single, friendly chatbot.

Services:
• Real-time weather forecasts for any city.
• Local event recommendations and attractions.
• Personalized outfit or umbrella suggestions.
• Collecting user feedback to improve recommendations.

Team:
• Mohamad Hamdan — Founder & CEO (former travel agent, expert in itinerary planning).
• Lina Badran — CTO (AI & data specialist, focuses on weather APIs and event integrations).

Unique Value Proposition:
EventForecast merges two everyday needs—weather updates and event discovery—into one smart assistant. Users can ask simple questions like "What's happening in Paris this weekend?" and receive both weather and event info instantly.
